What is a Sunday School Class?

Sunday School classes are groups of people who "do life together". The Bible teaches us that life is a journey that was never meant to be experienced alone.

Sunday School classes are as unique as the people that are in them but they all have a few things in common, Each group strives to accomplish these things:

1. Create an environment where each member of the group grows in their personal faith.
2. Create an environment where the group shares their lives with each other, cares for, and nurtures each other.
3. Create an environment where the group works to reach people outside of the group that do not know Christ or are not involved in a Sunday School Class.
